IFSH LOW MOISTURE FOODS SAFETY TASK FORCE

The 2021 IFSH Low Moisture Food Safety Task Force meeting will be held Thursday, September 16th from 10 am to 1 pm Central daylight savings time.

At the 2020 IFSH Low Moisture Food Safety Task Force (LMTF) meeting we introduced USDA NIFA funded project Sustainable, Systems-Based Solutions for Ensuring Low-Moisture Food Safety, which is an integrated, multidisciplinary, multi-institutional project. Now, the team needs your help! Your input at the meeting will directly influence project direction and activities.

At the 2021 LMTF meeting, we will be soliciting your direct input on several potential topics for which we need your perspective and insight, such as:

- What are the gaps in food safety/risks associated with low moisture foods?
- What are the gaps in sanitary design and sanitation methods for dry environments?
- What are the decision processes, criteria and barriers for adopting food safety technologies?
- What approaches to modernizing old facilities have the greatest impact?
- What are your low moisture specific training needs? Who are the target audiences? What are the best delivery channels?

Prior to the 2021 LMTF meeting, registered attendees will, through a brief online survey, directly determine the agenda by narrowing down to three or so topics of interest among respondents. At the meeting, we will utilize breakout groups to have intimate, focused discussions on these three topics (~45 mins each). After the meeting, we will follow up with a post meeting assessment to evaluate meeting effectiveness.

Attached is a framework for the meeting agenda that will be finalized after your input is received.
